

Subseq GmbH, located in Munich and Cologne, is skilled in managing and connecting/placing employees and external consultants in the project environment. With our know-how and excellent branches of expertise, we are the reliable link/bond between our customers and the appropriate specialists.

For the start-up of our Munich field of business, we are looking for a full-time colleague at their earliest convenience as:

Expert Consultant in Quality Management (with SAP R/3)

Responsibilities:

- Introducing and optimising processes with SAP QM
- Generating concepts, blueprints, and process and function lists
- Supporting acquisition
- Developing SAP add-ons
- Representing the firm externally
- Contact person for internal and external consultants

Knowledge and Skill Requirements:

- Training or studies in business, with several years' experience
- Very good knowledge of processes in quality management
- Very good knowledge of the SAP software module QM
- Good knowledge of interfaces with other modules
- Preferred industry knowledge (automotive, engineering, or pharmaceuticals)
- Preferred very good knowledge of one additional SAP software module
- Persuasive personality with an engaging demeanour
- Highly service-oriented and poised to assume responsibility
- Thoroughly familiar with MS Office applications

Your Advantages:

- Freedom to shape your work environment
- Predominantly flexible hours
- Fair earning potential with additional performance-related components
- Varied functions with flexible divisions of assignments and time

If you feel that this job description speaks to you, then we look forward to receiving your compelling application documents:
